

THE NEW NUMBER 1

ROADTIGER® driver seats for
large and mid-sized commercial vehicles

GRAMMER

For many drivers, driving a truck is not just a job but a passion that they have turned into a profession. At GRAMMER, we know what drivers expect of their workplace. With our seats, we want to help to ensure that driving a truck is as pleasant as possible. We provide maximum ergonomics, comfort and safety to make sure you never lose your passion throughout your entire career.

THE ROADTIGER® MODELS. SEAT COMFORT REDEFINED.

No matter whether it's a short or a long haul, the wheels must never stop turning. So it's important for this to be as comfortable as possible. Our new ROADTIGER driver seats give you a relaxed driving experience. With their modern and appealing design and high-quality upholstery, they enhance the cabin in every respect.

ROADTIGER - the new number 1

ROADTIGER seats offer many benefits in terms of comfort, ergonomics, quality, safety and value for money.

They come in three different versions - Standard, Comfort and Luxury - all offering carefully thought-out solutions for all users perfectly tailored for truck drivers' requirements in their daily routines.

ROADTIGER[®] LUXURY

The premium model

The ROADTIGER Luxury is a driver seat in a class of its own. Both in terms of its feature set and its look, it is an absolute highlight in the cab. Its upholstery is made from genuine high-quality leather of a type also found in the automotive luxury class.

In addition, it comes with an active seat climate system to ensure that the seat always has the perfect temperature. The climate system removes moisture from the body, preventing the driver from sitting in a pool of sweat at the steering wheel. On cold days, the seat heating system provides pleasant warmth. A further special feature of the ROADTIGER Luxury is the adjustable side support for the backrest and seat cushion, ensuring that the seat can be set even more individually to meet the driver's needs.

Key Features

(see fold-out page for information)

Pneumatic suspension

Automatic weight adjustment

Pneumatic lumbar support

Adjustable shock absorber

Fore/aft isolator

Active climate system

Seat heating 2 steps

Adjustable side support

Shoulder adjustment

Adjustable seatbelt height

The product shown may differ from the standard configuration.

ROADTIGER® COMFORT

The comfort model

The ROADTIGER Comfort offers added features to make the driver's daily routine that much more pleasant. In addition to the comprehensive standard fittings, the passive climate system and seat heating ensure the driver's wellbeing in all temperatures.

Thanks to the shoulder adjustment and the adjustable side support in the backrest cushion, the seat can be made to fit the driver even more snugly. The 3-step seat belt height adjustment positions the seatbelt perfectly on the driver's body.

THE FEATURES IN DETAIL

SUSPENSION COMFORT

Pneumatic suspension

Pneumatic suspension automatically adjusts to the driver's weight. The height can be set at the press of a button. There is no easier way than this of setting the suspension comfort.

Operating and seating comfort

Automatic weight adjustment

The seat automatically adjusts to the driver's weight, thus ensuring a relaxed and healthy seating posture.

Pneumatic lumbar support

The pneumatic lumbar support adjusts automatically, swiftly and exactly to the contour of the driver's back, offering ideal support for the back.

Fore/aft isolator

It minimizes vibration when driving fast, with additional equipment or trailers or in difficult terrain.

Active / passive climate system

Removes body moisture in high temperatures, keeping the driver pleasantly dry. The active seat climate system additionally supports this effect through ventilation.

Seat heating 2 steps

The 2-step heating provides cozy warmth in cold weather for a more comfortable driving experience.

Adjustable shock absorber

The adjustable shock absorber allows the seat to be adjusted to different driving conditions.

Shoulder adjustment

The shoulder adjustment feature allows the top part of the two-part backrest to be moved forward or back to give the driver added seating comfort.

Belt height adjustment

The height-adjustable belt allows different drivers to adjust the seat individually to match their height.

Tunnel-side backrest release

Tunnel-side backrest release is an additional function on the tunnel side of the seat facilitating access to the rear.

Adjustable side support for backrest cushion

The pneumatically adjustable side support gives the driver's back optimum support.

Adjustable side support for backrest/seat cushion

The combined adjustable side support for the backrest and seat cushion provides the driver with secure support in all driving situations.
